Subject: Mohave Valley Irrigation and Drainage District

Mike,

I appreciate you taking the time to discuss Mohave Valley Irrigation and Drainage District's interest in requesting Hoover power for agricultural users in our district. We look forward to participating in the upcoming allocation process but as initial step please accept the comments/questions outlined below. Per our discussion, these comments will be officially submitted once approved by the District Board, which doesn't meet again until after today's deadline for comments.

Question: per your enabling legislation/rules, will agricultural uses in irrigation districts be considered a high priority use of this preference power (Schedule A & B Power) supply?

Question: Will applicants without a current federal or state power allocation be considered a higher priority user for the Schedule A & B Power relative to applicants that already have allocations?

Thank you

Vince Vasquez
